info

INFO Signage LINUX player installation guide

Pre Installation steps

      Make sure the latest Chrome or [Chromium](#) Browser is installed.

      Disable the screen saver:

1. Start the application Settings
2. Choose Privacy under the personal heading
3. Choose Screen Lock
4. Toggle Automatic Screen Lock from the default "ON" to "OFF"

      Hide Notifications:

1. Go to Settings
2. Click on Notifications in the sidebar to open the panel.
3. Switch Do Not Disturb to on.
4. Switch Lock Screen Notifications to off.

      Prevent Screen Sleep:

1. Go to Settings
2. Go to Power Settings, then navigate to Power Savings Option
3. Set Screen Blank to Never

      Clean Apps: Uninstall all unneeded programs to prevent interference with the digital signage app.

      Disable Auto Update of Installed Apps (printer apps, Adobe Acrobat) to prevent them from popping up on the screen while digital signage is playing.

      To disable the automatic update notification from appearing on your screen when the digital signage is playing:

1. Open the Software & Updates from the Unity Dash or run *Software-properties-gtk* in a terminal.
2. Go to the Updates tab.
3. Uncheck the box for Automaticall check for updates.
4. Uncheck the box for Notifying me of a new Ubuntu Version if this option is available.
5. Close the app.

Note: This will stop Ubuntu from automatically downloading and installing updates, which can make your system less secure and stable.

Installation steps

      Step 1: Open Terminal

      Step 2: Copy paste the below script into the terminal:

      For (64-bit):

info

```
None

/bin/bash -c "$(curl -fsSL https://appds.io/linux/64.sh)"
```

This script will create a folder under your home directory called "digital-signage" and download the player binary, then set up a startup script to start the app on boot time.
Step 3: Restart your device by writing reboot in the terminal.

General recommendations:

1. Configure power to be always on.
2. Disable screen saver and any power saver.
3. Hide notifications, or disable them.
4. Disable auto updates
5. Disable or hide anything that may interfere with INFO Signage app
